

Supervision 5: Hopes and Fears of AI

Date: Tuesday 4th March.

Excellence: *the aim of this session is to emulate a seminar at university on the topic of the hopes and fears which surround AI. I want this session to really be a discussion between themselves and grounded in the resources I have asked them to prepare in advance and those I will show them during the supervision. I want to assess their reflective skills as well as their willingness to participate and engage with the topics.*

Pre-knowledge required: ideally they should come to the session confident having completed/watched the readings/videos we will be discussing.

Preparatory work required: [Lab 4](#).

Material needed:

- Prepare PowerPoint slides.
- Mark their homework and take notes to direct the discussion.

Plan

Session Start and Introduction (5min)

Remember to take attendance.

Small ice-breaker question: tell us what you're planning to do for the final presentation.
Go around the room, each person that goes names the person to go next.

Activity: Powerpoint (40min)

Share the presentation on my screen.

- Introduce face recognition and biometrics **(5min)**.
- Lead discussion on the content of Lab 4 **(15min)**.
- Show the two videos **(10min)**.
- Lead discussion on the content of the videos **(10min)**.

Summary: Question Time (5min)

Any questions?

Set the work for the following supervision: mention that they should submit by **Monday 17th March, 5pm** (~24h before the next supervision).

Buffer (5min)
